In those days social work was done in the form of helping the poor and needy persons. At present professional social workers assist individuals, groups, or communities to restore or enhance their capacity for social functioning, while creating social conditions favorable to their goals. They help prevent crises and counsel individuals, families, and communities to cope more effectively with the stresses of everyday life.

In schools, the social worker establishes a link between the students' families and teachers to help them in maintaining healthy

relationships among the school and the students.
